

CHARGETREEGO

portable wireless charging

The smarter, on-the-desk or on-the-go wireless charger

Charge 3 devices at once, when staying put or...when you go. ChargeTree Go charges your wireless enabled iPhone, AirPods, and even your Apple Watch all in a slim, vertical charger that folds up compactly when it's time for you to get going.

The on-the-Go ready version of the popular ChargeTree is a game changer. The slim, vertical format takes up minimal space on a desk or nightstand while charging three devices at once with a single cord, and the pop-out watch platform even enables nightstand mode. Folds compactly to travel from home to office to hotel and beyond, and still works as a charging platform even when collapsed.

Smarter Features

- » Portable convenience- Compactly folds for easy stowage and travel
- » Qi certified wireless charging - Qi charging coils charge wireless devices including iPhone, AirPods, and Apple Watch
- » Charging platform - Works as charging platform when folded up
- » Quick connect - Plugs into power input through USB-C (1 meter cable included). Requires 20W or greater wall block (not included)
- » Spring loaded, retractable Apple Watch charger holds and charges at just the right angle to enable Watch to go into nightstand mode
